

CheNan Liu

 New Taipei City, Taiwan

Senior Backend Engineer / Technical Lead

Senior backend engineer with 13+ years of experience designing and building **scalable, high-concurrency distributed systems** across gaming, media, and platform domains. Proven track record of leading engineering teams, delivering production-critical systems, and optimizing performance for real-time applications.

Expert in **Go and .NET ecosystems**, with strong experience in **microservices architecture, cloud infrastructure, and asynchronous systems** (gRPC, RabbitMQ). Adept at translating business requirements into reliable, maintainable backend systems.

Core Skills

Languages: Go, C#, Lua, JavaScript

Backend: .NET Core, ASP.NET MVC, Node.js

Architecture: Microservices, Distributed Systems, RESTful APIs

Infrastructure: Docker, AWS, GCP

Databases: PostgreSQL, MySQL, MSSQL, Redis

Messaging & RPC: RabbitMQ, gRPC

Other: System Design, Performance Optimization, Code Review, Agile Development

Education

Sep 2003- Jun 2007

St. John's University

**Department of Computer science
and Information Engineering**

Work Experience

Backend Engineer

Flash Co., Ltd.

Jan 2026 – Apr 2026

Taipei, Taiwan

- Led backend development for a **0→1 mobile application**, designing API services and backend architecture from scratch
- Integrated third-party services including **payment gateway (ECPay)**, eSIM providers, and Google Authentication
- Owned **GCP infrastructure**, including deployment, monitoring, and automation pipelines (CI/CD)

Senior Backend Developer

Canopus GBS

Mar 2025 – Nov 2025
Hsinchu, Taiwan

- Built scalable backend APIs to support mobile app features and external integrations
- Collaborated with enterprise partners including **PSMC and Tata Electronics** to deliver ERP migration projects
- Gathered and translated business requirements into technical specifications and documentation
- Established development environment and defined **coding standards and best practices** to improve team consistency

Senior Software Developer

KKTV

May 2024 - November 2024
Taipei, Taiwan

- Developed and maintained CMS platform supporting media content operations
- Containerized backend services using Docker, improving deployment consistency across environments
- Collaborated with cross-functional teams to deliver new features and improve system maintainability

Senior Game Developer

Future Tech

June 2022 - October 2023
Taipei, Taiwan

- Developed Telegram chatbot services and backend systems using Node.js and PostgreSQL
- Built game server components in Lua, supporting real-time interactions and event-driven workflows
- Delivered proof-of-concept (POC) projects to validate new product ideas and technical feasibility
- Authored technical documentation to improve team knowledge sharing and onboarding

Backend Lead

Jxtech

June 2021 - June 2022
Taipei, Taiwan

- Led a team of 5 engineers to deliver CMS and high-transaction backend systems
- Designed and implemented backend architecture using .NET MVC and MSSQL
- Improved team delivery efficiency through structured task management and code review processes
- Drove technical decision-making and ensured on-time delivery of multiple concurrent projects

Senior Backend Developer

FFglobaltech

October 2020 - April 2021
Taipei, Taiwan

- Built high-concurrency game backend services using Go
- Implemented inter-service communication via gRPC and asynchronous messaging using RabbitMQ
- Designed synchronization mechanisms for real-time game state consistency

Technical Lead / Senior .NET Developer

Lunfa Tech

March 2019 - January 2020
Taipei, Taiwan

- Led development of a lottery platform using C#, .NET Web API, and MySQL
- Designed system architecture and database schema for transaction-heavy workloads
- Conducted code reviews and managed task assignments across the engineering team

Technical Lead / Senior .NET Developer

Falcontek

June 2017 - March 2019
Taipei, Taiwan

- Developed and maintained high-traffic web platform using .NET and MSSQL
- Integrated third-party payment systems and built financial transaction modules
- Delivered back-office systems including reporting and fund management features

Senior Backend Engineer

Paradis-soft

November 2016 - May 2017
Taipei, Taiwan

- Built backend services using Go, MySQL, and Elasticsearch
- Integrated third-party game providers into platform ecosystem
- Deployed and maintained services on Linux-based environments (CentOS)

Project Leader Engineer

Boya Corporation

December 2015 - October 2016
Taipei, Taiwan

- Led backend development of platform systems using .NET technologies
- Coordinated development efforts and ensured delivery of project milestones

Senior Backend Engineer

Unalis Corporation

March 2014 - December 2015
Taipei, Taiwan

- Developed scalable web APIs supporting mobile applications (iOS/Android)
- Built backend systems using .NET MVC, Web API, and SQL Server
- Implemented Redis caching and service broker mechanisms for performance optimization

Backend Engineer (Early Career)

2010 - 2013
Taipei, Taiwan

- Developed and maintained web applications across multiple technologies including .NET, Java, and PHP
- Deployed cloud-based systems using AWS and Azure
- Gained experience in full-stack development and third-party API integrations
